THE 120 PROMPT OS

No payment needed on this release.

120 structured business prompts, written as an operating system and not a swipe file. Built for South African business owners. Every prompt comes with its purpose, the prompt text and the expected output, and it works with ChatGPT, Claude, Gemini and similar tools.

WHO IT IS FOR, AND WHO IT IS NOT FOR

Who it is for
Owner-run South African businesses that already use AI, handle their own marketing and want repeatable systems, not one-off experiments.

Built for South Africa
Local search, WhatsApp-first leads, rand pricing and POPIA awareness, with the FOUND framework included.

What it is not
Not AI running your business unsupervised, not guaranteed rankings, and not a get-rich-quick pack.

OUR PROMISE

No ranking guarantees and no get-rich-quick claims. The prompts are POPIA-aware and regulator-aware, and for regulated sectors AI drafts while a qualified person approves.

Free right now
The FOUND Prompt Library is free and ungated, with no email needed. The 120 Prompt OS needs no payment on this release.
